

LIBERTY SALES & DISTRIBUTION

PRINCIPAL MANUFACTURERS

APPALACHIAN ENERGY SOLUTIONS manufactures the Atlas pipe supports and clamps which provide a quick and reliable means to support and anchor piping systems. The Atlas supports and clamps offer easy height adjustment to level the piping and utilize fiberglass reinforced plastic pads to electrically isolate the pipe from the support. Available in sizes 1" to 48", Atlas products are typically specified on skid mounted stations, compressor facility piping, and a variety of above grade, piping applications.

A.Y. MCDONALD MFG. COMPANY is the leading manufacturer of Plug and Ball style Gas Meter Shutoff Valves utilized in both residential and commercial applications up to 175 PSIG. A.Y. McDonald offers a variety of Integral Valve and Standard Configuration Meter Bars, including single and multiple residential By-Pass Meter Bars and the newly developed Industrial By-Pass Bar. A full line of straight and off-set Meter Swivels, Meter Nuts, Meter Plugs and 3 Part Unions are also available. Setting the standard of safety, traceability tags provide accountability with a barcode that meets ASTM F-2897-15a.

BÖHMER is a worldwide leader in the manufacturing of forged, fully welded, trunnion mounted style ball valves for a variety of high pressure field applications. Nearly 60 years of German engineering and design have resulted in a state of the art production facility and one of the highest quality, flange/welded end valves available on the market. Böhmer Ball Valves are available in diameter sizes ranging from 2" thru 56" with ANSI Class 150 to 1500 nominal pressure ratings and are made in accordance with API 6D standards.

CANUSA-CPS

CANUSA-CPS is a global leader in field applied corrosion protection systems. Heat-shrinkable products include Wraparound, Tubular Sleeve Systems, Tapes, and Flange Protection Kits. HBE-95 Liquid Epoxy Coatings are for use in year-round applications. Scar-Guard® is a Fiber Reinforced Composite Mechanical Protection System for superior abrasion resistance during HDD applications. Overpipe® HDPE Protection Plates are specifically designed to protect buried pipelines against third-party damage and offer a reliable, economic, and environmentally friendly alternative to steel plates or concrete slabs.

CCI PIPING SYSTEMS specializes in providing a complete line of Casing related products for the Gas, Oil, Water, and Wastewater Industries. CCI's suite of high quality products include Wrap-It Link Seals, High-Density Polyethylene, Carbon or Stainless Steel Casing Spacers, the Omniroller, and Neoprene Rubber End Seals for casing pipe and wall penetration applications. CCI also offers ArmorCote U-Bolts possessing compressive strength and abrasion resistance along with excellent UV resistance for long term use in exposed installations.

CHASE CORPORATION is a leading manufacturer of field applied Coatings and Tapes for the Natural Gas, Oil, Water, and Wastewater industries. Chase's Pipeline Coatings division is comprised of the highest quality and well respected brand names including **Tapecoat®** and **Royston®**. Epoxies, Mastics, Petrolatum Wax Tapes as well as Casing Fill products and services are available.

CLOCK SPRING/NRI is the world's leading manufacturer of permanent and temporary Composite Pipeline Repair solutions with a full suite of highly engineered repair, rehabilitation and construction solutions for critical infrastructure which includes Atlas™, A+, ClockSpring and SnapWrap™. ClockSpring/NRI's products are designed to provide structural reinforcement, leakrepair, and corrosion prevention for pipeline and industrial piping applications. ClockSpring/NRI's proven solutions are easy to install, cost effective, and can be installed without service interruption.

LIBERTY SALES & DISTRIBUTION

PRINCIPAL MANUFACTURERS

CURRENT PIPELINE PRODUCTS specializes in mitigating the flow of electrical current in pipeline systems. Current Pipeline Products suite of cathodic solutions includes both the ALFA Monolithic Isolation Joint and the BARLOW Flange Isolation Joint. All ALFA and BARLOW Joints are factory tested and ready for installation upon receipt eliminating the need for field application kits.

DENSO is an internationally recognized leader in corrosion prevention and sealing systems for new and rehabilitation applications. DENSO developed the original Petrolatum Wax Tape with over 80 years of successful installations. DENSO's suite of corrosion products include: Petrolatum Wax Tapes for above or below grade applications, fast curing Protal Liquid Epoxies for standard, high and low temperatures, and wet applications, Bitumen and Butyl Tape systems, and Sealing/Molding products featuring Profiling Mastic for irregular shaped valves and flanged connections.

ECSI is the leading manufacturer of Gas Meter Brackets, PE Transition Fittings, and Magnesium Drive-In Anodes. Gas Meter brackets are typically used to support gas meter service installations in residential, commercial, and industrial applications. ECSI manufactures for the gas industry and has years of experience with metal stamping, forming and fabrication enabling ECSI to provide quality products that exceed customers' expectations.

GLAS MESH CO. manufactures a complete line of Fiberglass Reinforced Plastic (FRP) Corrosion/Abrasion control products for a variety of pipeline applications such as Bridge/Aerial Crossings, Compressor/Pumping Stations, and Meter Set/Station piping locations. Glas Mesh products include the FRP Shields, Spacers, Saddles, Flatties, Casing Insulators, Coated U-Bolts, and EPI-Seal Seam-Sealer in stock in Pennsylvania.

LB&A manufactures a variety of Non-Conductive Pipe Rollers, Pipe Hangers, and related support hardware for pipeline Bridge Crossing applications. LB&A's Hangers and related support hardware are available in a variety of corrosion prevention finishes including stainless steel and a proprietary BLUECOAT system. LB&A's products have been proven to provide long-term durability, weatherability, and performance in a variety of engineered applications. 100% domestically sourced materials are available upon request.

LIBERTY COATING COMPANY, LLC is the Northeast leader in the application of anti-corrosion coatings for the Gas, Oil, Electric, Water, and Wastewater industries. In addition to the PRITEC® coating system, Liberty Coating also applies ID/OD Specialty Paints, and Linings, as well as Pipe-Type Cable Flaring and Coatings. Liberty Coating is located on 35 acres with Rail and Truck access. Pipe handling, cutting, storage, bending, concrete coating, and logistical freight services are also available.

**Anodes, Tracer Wire
& Cathodic Protection**

LIBERTY SALES & DISTRIBUTION, LLC supplies a variety of Anodes, Reference Electrodes, solid/stranded copper Tracer Wire, and CP Wire for your Cathodic Protection needs. Tracer Wire is insulated with a rugged, moisture resistant High Molecular Weight Polyethylene (HMWPE) ideal for direct burial applications in the Gas, Fiber Optic, Water, and Wastewater Industries. CP wire is available in #2 - #8 sizes along with a variety of color options. Certain Anodes and Reference Electrodes are stocked for immediate availability.

LIBERTY SALES & DISTRIBUTION

PRINCIPAL MANUFACTURERS

Directional Drilling Coatings

LIBERTY SALES & DISTRIBUTION, LLC offers a variety of protective pipeline coatings from the industry's leading manufacturers for Horizontal Directional Drilling systems. These HDD products include liquid epoxy coatings such as Powercrete® R-95, Denso ARO, and the Scar-Guard® system.

Scar-Guard® is a Composite Mechanical Protection System designed for superior abrasion resistance and can be applied over a variety of corrosion coatings.

Fabrication and Metal Products

LIBERTY SALES & DISTRIBUTION, LLC serves the pipeline industry by distributing a wide selection of fabricated pipeline and metal products. Products available include custom designed commercial meter sets, pipe supports, residential meter brackets and a variety of flanged fittings built to your company specifications.

Liberty HD Rockshield®

LIBERTY HD ROCKSHIELD® provides high impact and abrasion resistance to protect all of your underground pipeline infrastructure needs. Made from a random looped, lead free, PVC material, this high-density Rockshield will save you money by eliminating the need for select backfill, and provide long term abrasion resistance for the life of the pipeline. Available in various sizes to accommodate your projects, Liberty Sales & Distribution has the Rockshield you need for underground pipeline protection.

Pipeline Markers

LIBERTY SALES & DISTRIBUTION, LLC can provide you with all your marking needs for both underground and above ground infrastructure. The Liberty Dome Post, Test Station, Vent Casing Post, and Flexible Marker Post are all made from impact resistant, UV stable plastics and resins that will provide long term marking protection. High impact and crack resistant, our markers meet DOT regulations and will not chip, peel or fade over time. Graphics are customized to meet customer specifications.

Pipeline Pigging Products

LIBERTY SALES & DISTRIBUTION, LLC serves the pipeline industry by distributing a wide selection of pipeline pigging products and accessories. Pipeline pigging products are available in most sizes for cleaning, scraping, swabbing, and batching solutions for your pipeline. Whatever the job requires, Liberty Sales & Distribution can provide you the proper Pig, Pig Launcher, or Pig Tracker, each customized to your specifications.

Tooling Products

LIBERTY SALES & DISTRIBUTION, LLC supplies a variety of tooling products, some of which are stocked at our locations in Hatfield and Canonsburg, PA. The Positector Inspection Kit, the Magnum Mini Torch Kit, Temperature/Humidity/Dew Point Gauges, Durometers, Testex equipment, Pit and Dent Gauge Kits, and more are available.

LIBERTY SALES & DISTRIBUTION

PRINCIPAL MANUFACTURERS

MONTIPOWER - Bristle Blasters are high quality surface preparation tools that provide consistent profile depth for field joints and countless other applications. The Bristle Blaster Kits are available in electric, pneumatic, and cordless models with a wide selection of attachments. They can be used in both shop and field applications and can provide Near White/White Metal surface cleanliness and anchor profiles up to 3.3 mils on API 5L Piping where traditional blasting is not feasible or economical.

nVent-ERICO is the worldwide CP Connections leader and was the first to develop the exothermic welded electrical connections that will never loosen, corrode, or increase in resistance. The remotely detonated CADWELD PLUS system provides your crews with simple, quick, and safe installations from outside the ditch.

OVERPIPE® manufactures rugged HDPE Protection Plates that are specifically designed to protect buried pipelines against third-party damage and offer a reliable, economic, and environmentally friendly alternative to concrete slabs. OVERPIPE® Protection Plates act as a warning device and can resist the assault of a 32-ton shovel to help prevent encroachment and pipeline damage. OVERPIPE® Protection Plates are lightweight, simple to install, and can be easily removed to allow inspection/repair of the line.

TECO AMERICAS - The FireBag® is a Thermal-activated Gas Shut-off Device that automatically stops the flow of gas in a fire. When activated, the FireBag® stops feeding gas to the flames and helps prevent the spread of fire. The FireBag® is activated when the external temperature of the Firebag® reaches 203-212°F (95-100°C). Internally, the metal alloy that keeps the plug and cartridge together melts, allowing spring pressure to plug and completely close the device. No instrumentation or detectors are required to automatically stop the flow of gas. Meets or exceeds DIN 3586 thermo activated safety device and UNI EN 1775 standards for indoor gas installations.
