2880 Bergey Road, Suite F, Hatfield, PA 19440 • 500 Alpha Drive, Canonsburg, PA 15317

Ph: 877-373-0118 • Fx: 888-850-3787

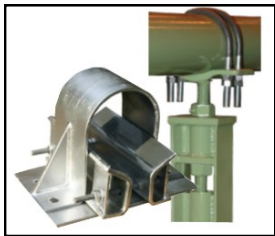

PRINCIPAL PRODUCT BROCHURE

PIPELINE COATINGS & CORROSION SPECIALISTS

www.libertysales.net

PRINCIPAL MANUFACTURERS

APPALACHIAN ENERGY SOLUTIONS manufactures the Atlas pipe supports and clamps which provide a quick and reliable means to support and anchor piping systems. The Atlas supports and clamps offer easy height adjustment to level the piping and utilize fiberglass reinforced plastic pads to electrically isolate the pipe from the support. Available in sizes 1" to 48", Atlas products are typically specified on skid mounted stations, compressor facility piping, and a variety of above grade, piping applications.

A.Y. McDONALD MFG. COMPANY is the leading manufacturer of Plug and Ball style Gas Meter Shutoff Valves utilized in both residential and commercial applications up to 175 PSIG. A.Y. McDonald recently entered an agreement to manufacture and distribute the established line of American Meter Natural Gas Regulators up to 150 PSI. A.Y. McDonald offers high quality, Pre-fabricated Meter Set Assemblies (MSA's) as well as a variety of Meter Bars including single and multiple By-Pass Meter Bars for use in Natural Gas. A full line of Chicago Fittings Risers, Straight/Off-set Meter Swivels, Meter Nuts, Meter Plugs and 3 Part Unions are also available with traceability tags per ASTM F-2897-15a for accountability.

CANUSA-CPS

Corrosion Protection & Sealing

CANUSA-CPS is a global leader in field applied corrosion protection systems. Heat-shrinkable sleeves include their K-Series, GTS, DDX/TBK, PLA and Aqua-Shield. HBE-95 Liquid Epoxy Coatings are available for year-round applications. Scar-Guard® is a fiber reinforced composite mechanical protection system for superior abrasion resistance during HDD applications. OVERPIPE® HDPE protection plates are specifically designed to protect buried pipelines against third-party damage and offer a reliable, economic, and environmentally friendly alternative to steel plates or concrete slabs.

CCI PIPING SYSTEMS specializes in providing a complete line of Casing related products for the Gas, Oil, Water, and Wastewater Industries. CCI's suite of high quality products include Wrap-It Link Seals, High-Density Polyethylene, Carbon or Stainless Steel Casing Spacers, WrapidSeal for Manhole Encapsulation, and Neoprene Rubber End Seals for casing pipe and wall penetration installations. CCI also offers ArmorCote™ U-Bolts possessing compressive strength and abrasion resistance along with excellent UV resistance for long term use in exposed installations.

CHASE
Pipeline Products

Tapecoat® Royston®

We make a *material* difference

CHASE CORPORATION is a leading manufacturer of field applied Coatings and Tapes for the Natural Gas, Oil, Water, and Wastewater industries. Chase's Pipeline Coatings division is comprised of the highest quality and well respected brand names including **Tapecoat®** and **Royston®**. Cold Applied Tapes, Epoxies, Mastics, Petrolatum Wax Tapes, Outerwraps, Terrashield, Handy Caps as well as Casing Fill products and services are available.

CSNRI

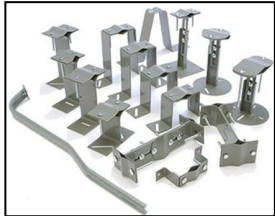

CSNRI® Composites is the world's leading manufacturer of permanent and temporary Composite Pipeline Repair solutions with a full suite of highly engineered repair, rehabilitation and construction solutions for critical infrastructure. Premiere products include the Atlas™, ClockSpring®, A+ Wrap™, Diamondwrap® and SnapWrap™. CSNRI's products are designed to provide structural reinforcement, leak repair, casing spacers and corrosion prevention for pipeline and industrial piping applications. CSNRI's proven solutions are easy to install, cost effective, and can be installed without service interruption.

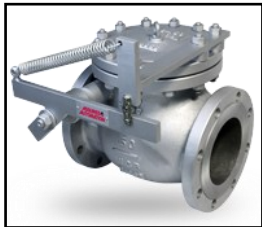

PRINCIPAL MANUFACTURERS

DENSO is an internationally recognized leader in corrosion prevention and sealing systems for new and rehabilitation applications. DENSO developed the original Petrolatum Wax Tape with over 90 years of successful installations. DENSO's suite of corrosion products include: Petrolatum Wax Tapes for above or below grade applications, fast curing Protal Liquid Epoxies for standard, high/low temperatures and wet applications, Bitumen and Butyl Tape systems, and Sealing/Molding products featuring Profiling Mastic for irregular shaped valves and flanged connections. Visco-Elastic self healing coatings are also available.

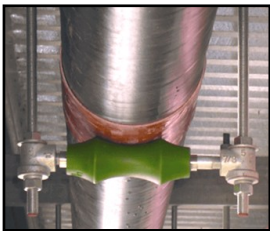

ECSI is the leading manufacturer of Gas Meter Brackets, PE Transition Fittings, and Magnesium Drive-In Anodes. The ECSI Gas Meter brackets are available in a variety of configurations and are typically used to support gas meter service installations in residential, commercial, and industrial applications. ECSI manufactures for the gas industry and has years of experience with metal stamping, forming and fabrication enabling ECSI to provide high quality products that exceed customer expectations.

ESOV is an Emergency Shut Off Valve designed to stop the flow of liquid, gas or vapor when exposed to fire or extremely elevated temperatures. The Emergency Shut Off Valves are flanged, swing-check valves with fusible links, with an externally loaded spring, designed to provide a simple and effective method of closing in an emergency or hazardous situation. ESOV's are available in 2" thru 16" diameters, and ANSI Classes 150# and 300#.

GLAS MESH CO. manufactures a complete line of Fiberglass Reinforced Plastic (FRP) Corrosion and Abrasion control products for a variety of pipeline applications such as Bridge/Aerial Crossings, Compressor/Pumping Stations, and Meter Set/Station piping locations. Glas Mesh products include the FRP Shields, Spacers, Saddles, Flatties, Casing Insulators, Coated U-Bolts, and EPI-Seal Seam-Sealer.

LB&A manufactures a variety of Non-Conductive Pipe Rollers, Pipe Hangers, and related support hardware for pipeline Bridge Crossing applications. LB&A's Hangers and related support hardware are available in a variety of corrosion prevention finishes including stainless steel and a proprietary BLUECOAT system. LB&A's products have been proven to provide long-term durability, weatherability and performance in a variety of engineered applications. 100% domestically sourced materials are available upon request.

LIBERTY COATING COMPANY

A Liberty Group Company

LIBERTY COATING COMPANY, LLC is the American Eastern Seaboard leader in the application of anti-corrosion coatings for the Gas, Oil, Water and Wastewater industries. In addition to the PRITEC® coating system, Liberty Coatings applies a variety of ID/OD Specialty Coatings and Linings from Induron and Carboline. Liberty Coating is located on 35 acres with Rail and Truck access. Pipe Handling, Cutting, Storage, Pipe Bending, Concrete Coating and Logistical Freight Services are also available.

PRINCIPAL MANUFACTURERS

LIBERTY SALES & DISTRIBUTION

Anodes, Tracer Wire & Cathodic Protection

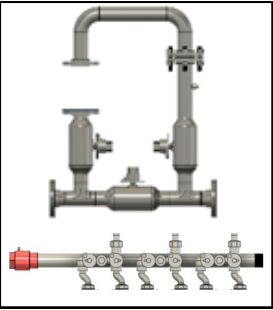

LIBERTY SALES & DISTRIBUTION, LLC supplies a variety of Anodes, Reference Electrodes, solid/stranded copper Tracer Wire and CP Wire for your Cathodic Protection needs. Tracer Wire is insulated with a rugged, moisture resistant High Molecular Weight Polyethylene (HMWPE) ideal for direct burial applications in the Gas, Fiber Optic, Water and Wastewater Industries. CP wire is available in #2 - #8 sizes along with a variety of color options. Certain Anodes and Reference Electrodes are stocked for immediate availability.

LIBERTY SALES & DISTRIBUTION

Directional Drilling Coatings

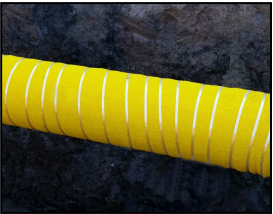

LIBERTY SALES & DISTRIBUTION, LLC offers a variety of protective pipeline coatings from the industry's leading manufacturers for Horizontal Directional Drilling systems. The HDD products we provide include established and proven coating systems such as Powercrete® R-95, Scar-Guard®, and Bore-Wrap®. Scar-Guard® is a Fiber-Reinforced, Composite Mechanical Protection System designed for superior abrasion and wear resistance that can be applied over a variety of corrosion coatings.

LIBERTY SALES & DISTRIBUTION

Fabrication and Metal Products

LIBERTY SALES & DISTRIBUTION, LLC serves the pipeline industry by distributing a wide selection of fabricated pipeline and metal products. Products available include custom designed commercial meter sets, manifolds, pipe supports, residential meter brackets and a variety of flanged fittings built to your company specifications.

LIBERTY SALES & DISTRIBUTION

Liberty HD Rockshield

LIBERTY HD ROCKSHIELD® provides high impact and abrasion resistance to protect your underground pipeline infrastructure needs. Made from a random looped, lead free, PVC material, this high-density Rockshield will save you money by eliminating the need for select backfill, and provide long term abrasion resistance for the life of the pipeline. Available in various sizes to accommodate your projects, Liberty Sales & Distribution has the Rockshield you need for underground pipeline protection.

LIBERTY SALES & DISTRIBUTION

Pipeline Markers

LIBERTY SALES & DISTRIBUTION, LLC can provide you with all your marking needs for both underground and above ground infrastructure. The Liberty Dome Post, Test Station, Vent Casing Post, and Flexible Marker Post are all made from impact resistant, UV stable plastics and resins that will provide long term marking protection. High impact and crack resistant, our markers meet DOT regulations and will resist chipping, peeling or fading over time. Graphics are customized to meet customer specifications.

LIBERTY SALES & DISTRIBUTION

Pipeline Pigging Products

LIBERTY SALES & DISTRIBUTION, LLC serves the pipeline industry by distributing a wide selection of pipeline pigging products and accessories. Our pipeline pigging products are available in most sizes for cleaning, scraping, swabbing and batching solutions for your pipeline. Whatever the job requires, Liberty Sales can provide you the proper Pig, Pig Launcher, or Pig Tracker, each customized to your specifications.

PRINCIPAL MANUFACTURERS

LIBERTY SALES & DISTRIBUTION

Tooling Products

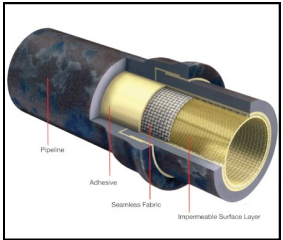

LIBERTY SALES & DISTRIBUTION, LLC supplies a variety of tooling products, many of which are stocked at our locations in Hatfield and Canonsburg, PA. The MONTIPOWER Bristle Blaster, Positector Inspection Kit, the Magnum Mini Torch Kit, Temperature/Humidity/Dew Point Gauges, Durometers, Testex equipment, Pit and Dent Gauge Kits, Spray Application Guns, Holiday Detectors, and more are in stock and available.

nVent-ERICO is the worldwide CP Connections leader and was the first to develop the exothermic welded electrical connections that will never loosen, corrode, or increase in resistance. The remotely detonated CADWELD PLUS system provides your crews with simple, quick, and safe installations from outside the ditch.

OVERPIPE® manufactures rugged HDPE Protection Plates that are specifically designed to protect buried pipelines against third-party damage and offer a reliable, economic, and environmentally friendly alternative to steel plates or concrete slabs. OVERPIPE® Protection Plates act as a warning device and can resist the assault of a 32-ton excavator to help prevent encroachment and pipeline damage. OVERPIPE® Protection Plates are lightweight, simple to install, and can be easily removed to allow inspection/repair of the pipeline while providing a layer of security and safety to people and property.

Progressive Pipeline Management is a full-service contractor and team of highly skilled infrastructure renewal specialists. Improving the safety and longevity of pipeline infrastructure since it started in 2002, PPM's primary expertise is trenchless technologies that inspect and restore aging, damaged or leaking underground infrastructure pipelines of all types and sizes. PPM is the sole licensee in North America for the Starline® Cured-In-Place-Lining (CIPL) technology for natural gas pressure pipeline rehabilitation from 4" to 48" in diameter and systems operating up to 300 PSI.

STOPAQ offers a full suite of Self Healing, Engineered, Corrosion Prevention Products that provide an environmentally safe, permeant solutions without the need for blasting media; minimizing surface preparation and reducing installation time. STOPAQ's primary layers consist of a fully amorphous, Polyisobutene composition that is impermeable and impenetrable to water, oxygen, and bacteria which commonly cause corrosion. The STOPAQ compound features a liquid-like behavior that retains its properties for superior adhesion and self healing capabilities in the harshest environments.

TECO AMERICAS - The FireBag® is a Thermal-activated Fire Safety Valve that automatically stops the flow of gas in a fire. When activated, the FireBag® stops feeding gas to the flames and helps prevent the spread of fire. The FireBag® is activated when the external temperature of the Firebag® reaches 203-212°F (95-100°C). Internally, the metal alloy that keeps the plug and cartridge together melts, allowing spring pressure to plug and close the device on service applications up to 150 PSI. No instrumentation or detectors are required to automatically stop the flow of gas. Meets or exceeds DIN 3586 thermo activated safety device and UNI EN 1775 standards for indoor gas installations. Now available with Data Matrix Labels for Tracking and Traceability.

PRODUCTS & SERVICES

Field Applied Coatings

- * Protal: 7125 / 7200 / 7300
- * HBE-95
- * Scar-Guard®
- * Bore-Wrap®
- * Powercrete® R95
- * Tapecoat H35 / H50
- * Tapecoat T-Tape / CT
- * Tapecoat TR Green
- * Petrolatum Wax Tapes
- * Fiberglass Outer Wraps
- * Sealing & Molding Products
- * STOPAQ Visco-Elastic Products
- * Butyl Tapes (Above/Below Grade)
- * Heat Shrink Sleeves & Tapes
- * Royston A-51 Liquid Mastic
- * Royston R-28 Rubberized Mastic
- * Casing Fill

Rehabilitation Products

- * ClockSpring®
- * Atlas™ & DiamondWrap®
- * A+™ and A+ Max™
- * Starline® (CIPL)

Factory Applied Coatings

- * PRITEC® Extruded PE Coating
- * Carboline 300 M
- * Carboguard 891
- * Interior Linings
- * Specialty Coating Systems
- * Protecto 401

Fabrication/Metal Products

- * Multiple Meter Manifolds
- * Commercial Meter Sets
- * Pipe Supports
- * Pipe Stands
- * Metering Station Prefabs
- * Regulator Station Prefabs
- * Gas Meter Brackets:
Adjustable Riser Brackets
Siding Gas Riser Brackets
Driven Post Risers Supports

Pipeline/Bridge Products

- * Rockshield
- * OVERPIPE®
- * Hangers and Assemblies
- * FRP Spacers, Shields & Saddles
- * Non Conductive Rollers
- * ALFA Monolithic Isolation Joints
- * Barlow Flange Isolation Joints
- * Pipeline Markers
- * Test Stations
- * Tracer & CP Wire
- * Anodes: #17 & #32
- * Casing Spacers (PE/Steel)
- * Wrap-It Link Seals
- * End Seals
- * Casing Seal Kits
- * CADWELD Plus
- * Steel & Polly Pipeline Pigs
- * Handy Caps
- * PPM Starline® (CIPL)

Tooling & Miscellaneous

- * Monti Bristle Blasters:
Cordless, Electric, Pneumatic
- * Holiday Detectors
- * Coating Inspection Tools
- * Epoxy Application Kits
- * Spray Application Guns
- * Spray Application Accessories
- * Epoxy Repair Cartridge Guns
- * Pyrometers
- * CADWELD Plus Control Units
- * CADWELD Molds
- * CADWELD Shots & Weld Metal
- * BAC Pin Brazing
- * BRICK Light (C1,D1 Lighting)
- * BodyLight - Battery Operated
- * Reference Electrodes

Gas Distribution Products

- * TECO FireBag®
- * ESOV Thermal Shut-Off Valve
- * Meter Set Assembly (MSA)
- * Meter Valves (Plug & Ball Style)
- * Meter Bars
- * By-Pass Meter Bars & Valves
- * Meter Swivels, Nuts & Unions
- * American Meter Regulators
- * Chicago Fittings Risers

Additional Services

- * Product Certification Training
- * PPM - Contractor Services
