

ATLAS PIPE SUPPORTS

Atlas Pipe Supports are used to provide a safe and reliable means to support and level piping systems.

Atlas III pipe supports provide 18" to 36" of vertical adjustment and are available in customized head configurations. Height adjustment is made easy using the base pin for larger adjustment increments or the threaded rod for finer adjustment.

The Atlas III is used on smaller diameter pipe and provides up to 36" of vertical adjustment. The support incorporates a tubular stanchion design and neoprene pad which prevents metal to metal contact of the pipe.

Note: Anchor bolts are not provided, follow proper anchoring procedures.

Manufactured to the highest quality standards, Atlas will save both time and labor which will result in increased profitability on your next project.

FEATURES

- FOR USE ON 2" TO 6" PIPE
- 18" TO 36" HEIGHT ADJUSTMENT
- NEOPRENE ISOLATION PAD
- BASE PLATE WITH FOUR HOLES
- CUSTOM DESIGNS AVAILABLE

OPTIONS

- HEAD CONFIGURATION:
 - ✦ SADDLE ONLY
 - ✦ SADDLE WITH (1) U-BOLT
- COATINGS:
 - ✦ PAINTED
 - ✦ GALVANIZED
- BASE PLATE:
 - ✦ WITH FOUR HOLES
 - ✦ WITHOUT HOLES
- INSULATING MATERIALS:
 - ✦ NEOPRENE
 - ✦ FRP

ATLAS PIPE SUPPORTS

MATERIALS OF CONSTRUCTION

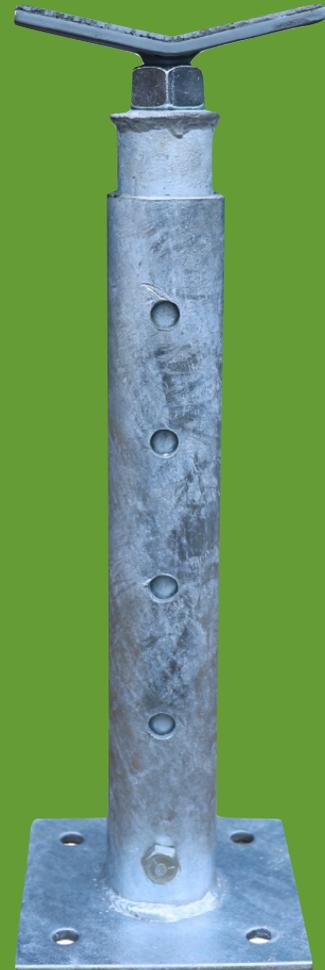

STANCHION: ASTM A-36 CARBON STEEL

THREADED ROD: ASTM A-108, ZINC PLATED

BASE PLATE: ASTM A-36, CARBON STEEL

INSULATOR: NEOPRENE PAD

U-BOLT* : HOT DIPPED GALVANIZED,
POLYOLEFIN COATING
