6480 Series Industrial Bypass Meter Bars: THIS CHANGES EVERYTHING. WITHOUT CHANGING ANYTHING.

A.Y. McDonald's 6480 Series By-Pass Meter Bars provides a safe, fast, and cost-effective alternative to gas utilities, by allowing them to change-out their customer's meters without interruption of gas service. Its innovative design will eliminate the time-consuming and costly coordination of scheduling change-outs, saving time and money.

The 6480 Series is intended for use with class 425 up to class 1000 Diaphragm Meters that are typically used in commercial applications such as a small factory, restaurant, or a single meter apartment complex.

For more information about the 6480 Series By-Pass Meter Bar, please contact your Territory Manager, or call 1-800-292-2737.

Features:

- Integral Soft Seat Ball Valves (2)
- High Security Locking Design
- Maximum Flow in Bypass Mode
- 1 1/4" or 1 1/2" End Connections (With Insulated Union Outlet)

Testing:

- 6480 Series bypass bar testing performance proven at GTI.
- 25 PSIG rated.
