

The foam disc pig is constructed of polyurethane foam with a durable polyurethane elastomer coating. The edges of the foam discs are left bare to provide a sealing surface, while the space between discs is coated to create durability and strength.

**FDP5 / FDP8
Foam Disc Pig**

Features:

- Durable polyurethane foam construction
- Multiple sealing points
- Bi-directional design
- Single piece construction

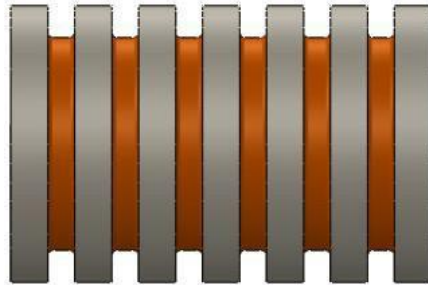

Applications:

- Batching applications
- Product removal
- Dewatering and hydrostatic testing
- Product recovery from process lines

Options:

- Handling rope/cable
- Transmitter cavity
- Magnets
- Medium or heavy density foam
