

# NATURAL GAS Product Bulletin

## Why ArmorGalv®

### Features

- Thermal Diffusion Zinc Coating up to .002” thick
- Coating is applied per ASTM A 1059 and designated for Class 50
- Intermetallic bonded layers of zinc and iron above the base casting material
- Will have the appearance of a dull gray, sometimes mottled surface
- It is classified as a Zinc coated valve and will outperform a standard valve for corrosion
- Machined surfaces are not coated and additional protection may be required per local codes
