

Anodeless Rigid Risers

For more information, please scan this QR code.

Rigid Risers come pre-assembled with ASTM certified, polyethylene (PE) tubing. Designed for unmatched durability, the Rigid Riser has a solid carbon steel casing to protect the gas line from any above-ground damage, and an electrostatically applied coating for corrosion resistance.

On the connection end, the heavy wall thread and convenient wrenching hex creates an ease of installation. Simply engage the CNC quality ANPT threads to the connection point, tighten it securely, and the work is done.

These risers are compatible for heat fusion joining with pipe or fittings manufactured from like or similar resin by butt fusion, socket fusion, or electrofusion methods. Mechanical fittings can be used to install Anodeless Rigid Risers depending on local requirements. Mechanical fitting options include stab and compression fittings.

Features:

- Double O-Ring Seal
- PE Tubing
- Heavy Wall Thread
- Electrically Applied Coating for Quality
- Traceability
- Wrenching Hex
- Electronic Leak Testing
- Meets all ASTM Performance Qualifications
- CNC Quality ANPT Threads
- Completely Coated Threads
